

Gender Pay Gap Statement 2025

Eurosyst company document

Purpose

Eurosyst supports fair, objective and non-discriminatory pay practices. This statement is provided as a company commitment and does not reproduce or adopt gender pay data belonging to any other organisation.

Statutory reporting

UK gender pay gap reporting requirements apply to employers that meet the statutory employee threshold and reporting criteria. Eurosyst will publish the required statutory figures if and when those requirements apply to the company.

Our approach

Recruitment and pay decisions should be based on legitimate role requirements, experience, competence and responsibility.

We aim to provide equal opportunity and to avoid unlawful discrimination in recruitment, deployment, development and reward.

We will review workforce and pay practices as the organisation grows and will address identified unjustified disparities.

Data integrity

No gender pay percentages are stated in this document because figures should only be published where they are calculated from verified Eurosyst payroll data using the applicable statutory methodology.
